

BATH CRYSTAL BALL

CHLORINE FREE BATH

Enjoy your bath without the harmful effects of chlorine. Return your skin to its organic balance. Excellent for sensitive or dry skin.

Chlorine is universally used to chemically disinfect water. Chlorine is added to your water to destroy germs, bacteria and living organisms. Of course, you are also a living organism. Your body is attacked by chlorine internally as well as externally.

After removing chlorine from your bath you will see changes including...

- Healthier, younger looking skin
- Relief from dry, flaking skin & scalp
- Softer, more manageable hair
- Less fading on colour-treated hair
- Healthier eyes and lungs
- Safe for infants, adults and pets as it is non-toxic

How it works

The Rainshow'r bath filter effectively removes 90% or more of chlorine from bath water by converting the chlorine into an environmentally safe soluble zinc chloride. When water comes in contact with the media filament inside the fabric pouch, the chlorine ions in the water are converted into a harmless chlorine. The toxic effects of chlorine, chloramines and chlorine gas are eliminated with the aid of a special media. Chlorine is removed quickly when the Crystal Ball is circulated through the bath water. The crystalline quartz mixed with the media reduces the molecular structure of water into smaller clusters enhancing sudsing and lathering of soap.

As a result the bath water is healthier and feels better. Your skin can return to its natural organic balance.

The media pouch should be replaced every 12 months.
