If you want premium filtered water, Doulton, made in England, is world renowned for top quality ceramic water filters.

Super Sterasyl™ uses granular activated carbon instead of an activated carbon block in order to give superior flow rates in a gravity filter. With its Absolute filtration rating (defined as >99.99%) of 0.9 microns Super Sterasyl is highly effective against particulate contamination, pathogenic bacteria, cysts etc, with the additional benefit of chlorine and organics removal capabilities.

Cleaning simply involves scraping the cartridge under running water. Once the surface is white, the cartridge is ready for use again.

FILTER EFFECTIVENESS

TASTE AND ODOUR

ELIMINATED

Reduces harmful bacteria (e.coli, cholera, shigella, salmonella, klebsiella)	>99.9%
Cyst Reduction including Cryptosporidium and Giardia)	>99.999%
Absolute filtration 0.9 micron	>99.9%
For particles between 0.5 and 0.8 micron	>99.9%
Removes (Algae, rust, sediment & suspended solids)	>99.9%
Turbidity reduction	>97%
Removes Guinea worm	100%
Chlorine reduction @1.2 litres per min under pressure (254mm candle)	>50%
Chlorine Reduction @ 1.2 litres per min under gravity (178mm candle)	>95%
Recommended flow rate	1.5 litres per min
Flow rate under gravity	1 litre per min
